

# UPGRADE TO QUALITY COMPOST

# BROWN IS THE NEW GREEN

Compost creates healthier soil  Not all compost is created equal

Industrial Waste

Animal Waste

Wood Chips

## Why would quality compost be good for you?

- Microbes in compost begin to make nutrients more available to the plant and root system
- The process will have an impact on compaction in the first 6 months
- Compost microbial life will unlock tied up nutrients in your soil
- Improved soil health, increased germination rates, and higher antioxidant levels

## Benefits

- ✓ Fewer pesticides
- ✓ Guaranteed no weed seeds
- ✓ Increased organic matter
- ✓ Free from pathogens and pest larvae
- ✓ Better water infiltration
- ✓ Increased water retention
- ✓ Stable and mature nutrients
- ✓ Have an impact after one application

**Certified for you!**

We are an IDEM permitted industrial waste products composting site.
